

HUMIDITY SEPARATOR AND STRAINER S252/F PN16 – PN40

DESCRIPTION

S-252/F series centrifugal separators remove moisture from steam and compressed air pipelines. Steam and compressed air passing through the separator and as a result of centrifugal forces, impact and swirling effects, separate the particles with a heavier specific gravity, such as water and oil droplets, moisture in suspension, dirt and scale.

The condensate collected at the bottom of the separator, must be automatically drained by a suitable steam or compressed air trap.

Connections are flanged.

MAIN FEATURES

Several possibilities of installation.

No moving parts.

Stainless steel strainer screen included

OPTIONS: Zinc plated (compressed air)
Condensate flanged connection.

USE: Steam, compressed air and other gases (Group 2).

AVAILABLE MODELS: S252/FS - carbon steel body.
S252/FSZ - zinc plated body

SIZES: DN15 to DN300.

PIPE CONNECTIONS: Flanged EN1092-1 PN16 and PN40
ANSI Class 150 lbs and Class 300 lbs
Female screwed BSP or NPT on request.

INSTALLATION: Always with the condensate discharge pointing downwards.
See IMI, installation and maintenance instructions.

HOW TO SELECT: Generally, in an existing plant it is advisable to fit a separator of the same size of the pipe line. Pressure drop is normally negligible. For approximate pressure drop calculation please consult.

HOW TO ORDER: Carbon steel humidity separator/strainer PN16 with inlet
(Example) DN 150 and two DN100 outlets
Model S252/FS PN16 DN 150x100x100

CE Marking

This product has been designed for use on water steam, air and other gases which are in Group 2 of the PED-European Pressure Equipment Directive 97/23/EC and it complies with those requirements.

The product carries the CE mark when falling in category 1 and above.

Dimension A1 is always half of A

* Volume correspond to the PN16 design class. Classes PN25 and above may have slightly lower volumes.

** Weight correspond to the class PN16 design.

F and G -screwed drain connections as standard. Alternatively can be supplied flanged EN1092-1 or ANSI on the same class of main dimensions. In this case an elbow might be necessary for deviation of one of them.

Consult factory for certified dimensions. Dimensions subject to change without notice.

Note: the top of the separator is supplied with a threaded connection with a size not exceeding the size of drain one. This connection is always supplied closed with a threaded socket. It can be used for air vent or balancing pipe connection.
